9.0 RESPONSE TO COMMENTS

9.1 SUMMARY OF VERBAL AND WRITTEN COMMENTS RECEIVED DURING THE PUBLIC REVIEW PROCESS FOR THE DRAFT EIR

Written comment on the Draft EIR received during the public review period are included in this section. The comment letters are provided at the end of the section, following all of the responses. When a comment is made by multiple parties, the response is provided the first time the comment is made and all other similar comments are referred back to that response.

The format of the responses to all the comments is based on a unique letter and number code for each comment. The letter and number immediately following the letter refer to an individual agency, business, group, organization, or member of the general public comment letter. The number at the end of the code refers to a specific comment within the individual letter. Therefore, each comment has a unique code assignment. For example, comment L-1 is the first comment in letter L1.

Comments were received on the proposed Draft EIR and they were reviewed to determine whether there is substantial disagreement about the potential significance of impacts. Any issues raised concerning potentially significant impacts were reviewed, addressed, and clarified.
