**RE: 832 PATTERSON AVENUE
ADMINISTRATIVE EXCEPTION CASE NO. PAE 1408286**

Dear Ms. Hardie

Pursuant to the provisions of the Glendale Municipal Code, Chapter 30.44.020 (E) for a maximum twenty (20) percent deviation from one or more numeric standards in this Title, the Community Development Department has processed your application for an Administrative Exception to allow an existing detached garage to be maintained with a garage door width of 15-feet, 6 ½ - inches where a minimum 16 foot garage door width is required (2.86 percent deviation) by Chapter 30.32 of the Glendale Municipal Code in conjunction with a 356 square-foot addition at the rear of the existing house. The subject property is located at **832 Patterson Avenue**, in the "R1" – (Low Density Residential) Zone, Floor Area Ratio District II, and described as Lot 18, Tract No. 7463, in the City of Glendale, County of Los Angeles.

ENVIRONMENTAL RECOMMENDATION

This project is exempt from environmental review as a Class 1 "Existing Facility" exemption (Section 15301 (e) (1) of the State CEQA Guidelines).

REQUIRED/MANDATED FINDINGS

After considering the evidence presented with respect to this application, the plans submitted therewith, the Planning Hearing Officer has **GRANTED WITH CONDITIONS** your application based on the following findings:

- A. The granting of the exception will result in design improvements, or there are space restrictions on the site that preclude full compliance with the Code requirements without hardship.**

The subject property is a 4,332 square foot lot developed in 1925 with an existing 987 square foot, one-story single family residence. A detached 414 square foot garage, with attached 194 square foot recreation room was built in 1960. The house consists of two bedrooms and one bathroom. A small addition to the master bedroom is proposed,

including a new master bathroom and walk-in closet. In addition, the dining room is to be extended and the washer and dryer are proposed to be moved from the laundry room adjacent to the garage to inside the house. The proposed addition will functionally enhance the interior living space and will match the exterior architectural style and materials. The addition will not increase the number of bedrooms. The proposed addition will be constructed in a way that is compatible with the existing architecture that will maintain the integrity of the residence. By placing the addition at the rear, design improvements would occur because the small-scale character of the residence and street elevation will be maintained, while at the same time providing a reasonable use of the property. Design improvements to the interior of the residence also would occur by increasing the functionality of the floor plan.

The existing two-car garage is 96 feet from the street property line and it is accessed by an eight-foot, three-inch wide, 96-foot long driveway on the east side of the property. Furthermore, the depth and width of the existing garage at 21-feet, two-inches by 19-feet, seven-inches complies with code requirements and the garage door width at 15-feet, six and a half inches is approximately 97 percent of meeting the requirement for the door width. Requiring the expansion of the garage door, for this minimum deviation unduly restricts the flexibility for reasonable use and improvement of the property for a reasonable addition.

B. The granting of the exception will not be materially detrimental to the public welfare or injurious to the property or improvements in such zone or neighborhood in which the property is located.

The purpose of the addition is to make the house more functional by enlarging the dining room area and existing master bedroom and adding a laundry room to improve the floor plan of the house. This proposed expansion will be located at the rear of the residence and will not create additional bedrooms and therefore is not anticipated to intensify parking demand. The existing garage will continue to provide two enclosed parking spaces for the sole purpose of parking vehicles. Also, the approximately 96-foot long driveway provides temporary off-street parking outside of the street-front setback area. As such, the project will not be detrimental to the public welfare, injurious to the property, or improvements in the zone. The addition will not be visible from the street; it will maintain the existing architectural design of the house, and will still allow for adequate open space, light, and ventilation for the subject residence as well as adjacent residences.

C. The granting of the exception will not be contrary to the objectives of the applicable regulations.

The proposed addition meets all other Zoning Code requirements of the R1 Zone, such as lot coverage, floor area ratio, landscaping, and setback. The purpose of the administrative exception procedure is to provide a simplified means for considering applications for minor deviations from Code standards. These standards have been developed to allow reasonable use of properties in order to promote the public health, safety, and general welfare. The proposed 356 square foot addition will allow reasonable development of the

site and allow the existing garage to still serve the single family residence. Therefore, granting the minor exception for less than the minimum garage door width will not be contrary to the objectives of the applicable regulations.
