

Be Prepared for Winter

With winter approaching it is time to get properties ready for the rainy season. Here are some basic steps to protect your property from flood and soil erosion

Tips For Inside and Outside Your Home

How to Prepare

- Learn Glendale's emergency plans and signals
- Plan and practice flood evacuation route
- Post emergency phone #'s by telephones
- Inform authorities of special needs
- Identify and correct potential hazards

Proactive Steps

- Anchor movable objects in yard
- Clear debris from roof gutters and area drains
- Eliminate encroaching vegetation, leaves, and debris from draining ways, and curb line gutters
- Install flexible fittings on gas and water lines
- Landscape to prevent erosion
- Control water flowing onto property
- Control run-off on slopes and strengthen soil
- Install waterproof veneer to outer walls and seal all openings
- Prepare and place sandbags and other water-proofing materials prior to flood
- Install sump pumps and backflow valves or plugs
- Raise electrical components above flood level
