

## Paving and Parking in the Front Yard

1. Paving (flatwork) in the front setback is limited to genuine driveways and walkways. Existing driveways already comply with zoning rules.
2. Adding more pavement for extra parking space in the front yard is prohibited.
3. Vehicle parking is not allowed in any setback area, unless it is temporary, and on an improved driveway, or in an approved garage or carport.
4. Any parking other than temporary will be considered storage.

See Glendale Municipal Codes (GMC) 10.28.090, 10.36.130 AND 30.32.120

A setback is the required space between the property line and the distance from the housing structure.
