

ELECTRICAL SERVICE REQUIREMENTS

2014

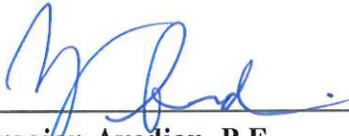

The Electrical Service Requirements provide the most current information pertaining to electrical service connection in the City of Glendale. These requirements are established for the guidance of customers, electrical contractors, engineers, architects, and manufacturers engaged in the installation and design of electrical service wiring and service equipment. Every effort has been made to make this document as accurate as possible and free of errors. The information in this document does not give the right to violate any City, State or National Codes.

Changes to this manual are highlighted with gray shading. Editorial changes are not highlighted.

If you need additional information, technical assistance or to report any discrepancies relating to these requirements, contact:

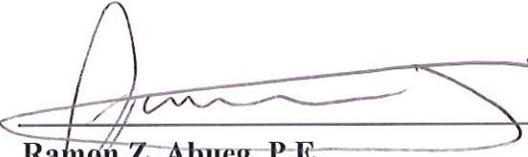

Glendale Water & Power
Customer Service Engineering
141 N. Glendale Ave., 4th level
