

# VERDUGO NUMBERED MEMO

#2008-02

August 27, 2008

---

## VERDUGO POLICY MANUAL – SECTION 6 – RADIO PROCEDURES

Please find attached the Verdugo Policy Manual Section – Section 6 – Radio Procedures. This revised section addresses numerous changes with regard to radio procedures within Area C as well as that of the radio system as the result of our recent migration to ICIS (Inter-agency Communications Interoperability System). This section should address the myriad of questions related to those changes and sets guidelines for the users of the Verdugo Fire Communications Radio System.

It was agreed that the best method of delivery should be electronically to the Area C Fire Chiefs for their further dissemination within their agency. As revisions are made, a new PDF will be published with the most recent revision date as part of the file name. It is strongly recommended that all personnel utilizing the radio system read this document.

Future revisions of the Verdugo Policy & Procedures Manual will also reside on the Unified Response website, at: <http://www.unified-response.org/authorized.asp>

Due to the sensitivity of the type of information contained in this section, the PDF has been password protected in order to open the document.

That password is:

*(Please check with a Chief Officer for a hard copy of this section or for the password)*

We ask that when distributing this document, it be conveyed to those individuals having a need for access to this information, as to the confidentiality of this information and the associated need for keeping it within our system.

Respectfully,

Don Wise  
Interim Fire Communications Administrator  
Verdugo Fire Communications Center
