<b>Total</b>			3	0		

**DRB Decision:** Approve with conditions.

#### Conditions:

- Landscape plans shall be revised so that each of the three properties has a different but complimentary variety of planting material.
- Additional fenestration shall be placed on the west elevation.

#### Considerations:

- Consider reducing the size of the rear yard, thereby reducing the height of the rear yard retaining wall.

#### Analysis:

**Site Planning:** The proposed site planning is appropriate, as modified by the conditions, to the site and its surroundings for the following reasons:

- Placement of the house conforms to the underlying topography of the site.
- The 25-foot street-front setback is appropriate given the sizes of the house and lot.
- The orientation of the residence minimizes the appearance of the attached garage.
- Landscaping is drought-tolerant and sensitively placed on the site. A condition has been added to approval of the project that landscape plans be revised so that the three properties contain a variety of plant species, which complement each other.

**Mass and Scale:** The proposed mass and scale are appropriate, as modified by the conditions, to the site and its surroundings for the following reasons:

- The proposed residence follows the slope of the on-site topography
- The flat roof is consistent with the contemporary design of the residence.
- The building form and profile follow the topography.
- As conditioned, the height of the rear retaining wall will be reduced to reduce the size of the rear yard, to better conform to the Hillside Design Guidelines.
- As conditioned, the west elevation shall include additional fenestration to reduce the sense of mass.

**Design and Detailing:** The proposed design and detailing are appropriate, as modified by the conditions, to the site and its surroundings for the following reasons:

- The design, detailing and materials proposed for the residence are consistent with its contemporary design.
- Proposed aluminum windows are of high quality and appropriate to the style of the residence.
- A variety of materials are used to enhance the overall design and create visual interest.
- The entry is integrated and recessed into the building volume.
- As conditioned, the Alabaster color of the stucco will be replaced with a more natural color to blend with the hillside location of the residence.

Notes:

Contact the case planner for an appointment for a DRB stamp. DRB stamps will no longer be stamped over the counter without an appointment.

The Design Review Board approves the design of project only. Approval of a project by the Design Review Board does not constitute an approval of compliance with the Zoning Code and/or Building Code requirements.

If an appeal is not filed within the 15-day appeal period of the Design Review Board decision, plans may be approved for Building Division plan check. Prior to Building Division plan check submittal, Design Review Board approved plans must be stamped approved by the Design Review staff.

Any changes to the approved plans may constitute returning to the Design Review Board for approval. Prior to Building Division plan check submittal, all changes in substantial conformance with approved plans by the Design Review Board must be on file with the Planning Division.
