

VERDUGO FIRE NUMBERED MEMORANDUM

#01-2017

July 1, 2017

CAD TYPE CODES: EMERGENCY & NON-EMERGENCY RESPONSES

Background:

The Area C Operations Committee recently reviewed Verdugo Fire's Computer-Aided-Dispatch (CAD) Type Codes. The goal is to reclassify certain CAD Type Codes as non-emergency responses versus those that will remain as emergency responses. The review supports conditions for authorized Red Lights and Sirens (RLS) responses within the communities that the Verdugo Fire Communications System serves.

According to the report, "Considerations for Toward Zero Deaths: A National Strategy on Highway Safety," prepared by the National Association of State Emergency Medical Services Officials in 2010, "EMS providers are at greater risk of death on the job than their police and firefighter counterparts, with 74 percent of EMS fatalities being transportation-related. This and other studies have estimated the fatality rate for EMS personnel at more than twice the national average" (excerpted from U.S. Fire Administration, [Emergency Vehicle Safety Initiative](#), dated Feb. 2014).

This reclassification effort is to potentially reduce both the risk and the liability of first-responders traveling to certain incidents as a non-emergency response, as opposed to Verdugo's current practice of dispatching all apparatus as an emergency situation. Furthermore, the non-emergency codes will be suppressed and/or Tableau reports modified to separate non-emergency codes from emergency codes for performance reporting.

However, both incident and response counts will remain unchanged. The work will potentially also reduce the "wear and tear" on responding apparatus resulting in decreased maintenance costs. An intangible benefit, but one that might be potentially realized, is improvement in customer service when responders understand they're responding to a less urgent incident, not using RLS. Approximately 2-3% of all dispatched incidents will be affected by this change.

Guidelines/Policy:

- The dispatch of any non-emergency codes shall be: "Unit Identification, respond non-emergency. {CAD Type Code}, address, cross-street(s), assigned radio channel. Example: "E33 respond non-emergency. Minor Flooding. 1400 W. Colorado Blvd between Melrose and Avenue 64, RED-1.
- Non-Emergency – a response in which all traffic laws are obeyed, no exceptions, but in which travel and/or transport is carried out expeditiously.
- Emergency – a response in which the apparatus proceeds with red lights and siren, always driving with normal precautions and explicitly follows departmental policy.
- All personnel responding to incidents shall both review and have full understanding of the differences between non-emergency and emergency Computer-Aided Dispatch (CAD) Type Codes.
- Supervisory field personnel, i.e., Chief Officers and Captains, shall authorize non-emergency or emergency responses or approaches at their discretion, taking into account:
 - Their historical knowledge of a specific address, patient, zone, area or other geography which may dictate either a higher or lowered response.
 - The initial text entered into the incident history or any additional verbal or supplemental text information which may dictate either a higher or lowered response or cancellation.
- This policy has been reviewed and recommended by the Area C Operations Committee, reviewed and approved for recommendation by the Verdugo Operations Committee, approved by the Verdugo Fire Executive Committee and Area C Fire Chief's.
- This policy is effective system wide within the Verdugo Fire Communications System: July, 1, 2017

- CAD Type Codes by Response Type:

EMERGENCY RESPONSES

TYPE CODE	DESCRIPTION	CATEGORY	DEFAULT RESPONSE LIST	ALS/BLS	EMERGENCY/NON- EMERGENCY
ABD	ABDOMINAL PAIN	MEDICAL	1E or 1T 1ALS	ALS	EMERGENCY
ALARM	FIRE ALARM	FIRE	1E or 1T		EMERGENCY
ALERGY	ALLERGIC REACTION	MEDICAL	1E or 1T 1ALS	ALS	EMERGENCY
ALERT1	AIRPORT ALERT 1 - STANDBY	FIRE	4V		EMERGENCY
ALERT2	EMERGENCY LANDING AT AIRPORT	FIRE	3E 4V 1T 1ALS R17 1BC		EMERGENCY
ALERT3	PLANE ACCIDENT, DOWN OR FIRE	FIRE	3E 4V 1T 1ALS R17 1BC 1HL		EMERGENCY
ALOC	ALTERED LEVEL OF CONSCIOUSNESS	MEDICAL	1E or 1T 1ALS	ALS	EMERGENCY
APPL	APPLIANCE FIRE	FIRE	2E 1T 1BC		EMERGENCY
APT	APARTMENT HOUSE FIRE	FIRE	3E 2T 1ALS 1BC		EMERGENCY
ARC	ARCING WIRES	SERVICE	1E or 1T		EMERGENCY
ASLT	ASSAULT VICTIM	MEDICAL	1E or 1T 1ALS	BLS	EMERGENCY
BACK	BACK PAIN	MEDICAL	1E or 1T 1ALS	BLS	EMERGENCY
