

ASSISTIVE TECHNOLOGY

Software for people with visual disability

- **WYNN Wizard** ver. 2.01

Assists in reading and comprehension by spotlighting each word as it reads it aloud, provides optical character recognition (OCR), the ability to scan a printed page and convert it into electronic text.

- **WYNN Reader** ver. 2.01

WYNN Reader includes all of the features available in WYNN Wizard except the OCR capability.

- **ZoomText XTRA** ver. 8.1

ZoomText Xtra Level 2 features synchronized magnification and screen reading that's powerful and easy to use. Designed for the low-vision user, Level 2 speaks all on-screen text, echoes typing and automatically reads multi-page documents. Level 2 also includes two free speech synthesizers that work with any Windows sound card.

- **Jaws** ver. 5.0

The most popular screen reader worldwide, JAWS for Windows works with your PC to provide access to today's software applications and the Internet. With its internal software speech synthesizer and the computer's sound card, information from the screen is read aloud, providing technology to access a wide variety of information, education and job related applications.

Communication Software

- **Next talk VM** ver. 3.15h

A personal communications software that allows you to use compatible voice modems to make and receive TTY calls.

Complete communications access for the deaf and hard-of-hearing or for anyone who needs text-based communication.
