Questions / Comments

Construction Phasing

## Project Purpose

- Rehabilitate deteriorated street pavements
- Replace damaged sidewalks, driveways, curbs, and gutters
- Comply with Americans with Disabilities Act
- Traffic improvements

# Doran Street and Adjacent Streets Improvements Project

## Types of Street Work

-  SLURRY SEAL       EXISTING TRAFFIC SIGNAL UPGRADE  
 STREET RESURFACING       NEW TRAFFIC SIGNAL INSTALLATION

# Construction Schedule

ANTICIPATED CONSTRUCTION START

***May 2016***

(Contingent of the funding Approvals)

PROJECT DURATION

***6 months (20 weeks)***

*(barring any unforeseen conditions)*

# Doran Street And Adjacent Streets Improvements Project

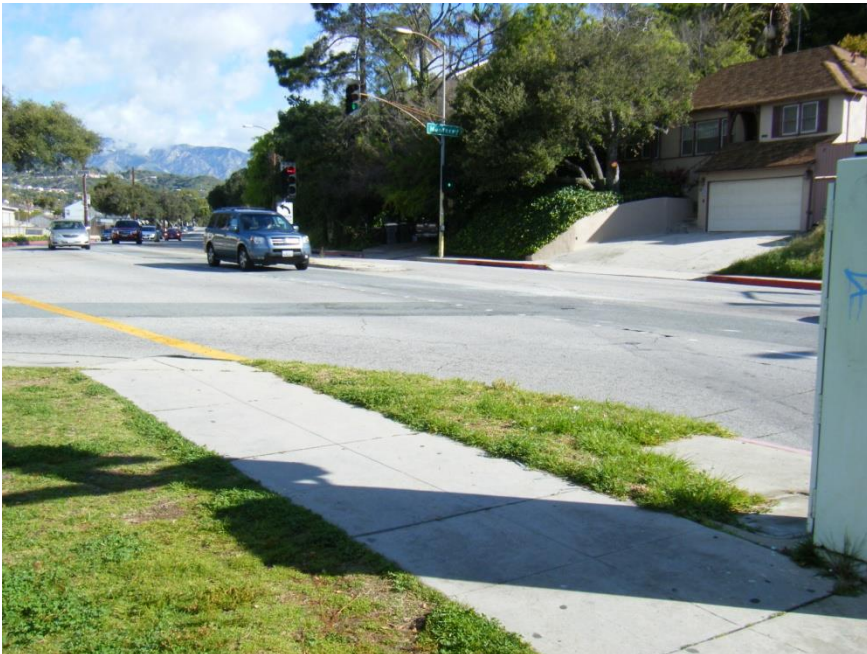

- Repair failed pavement
- Replace damaged curbs, gutters, sidewalks, driveways
- Install/Upgrade curb ramps to meet current standards
- Pavement surface treatment (resurfacing, reconstruction)

# Doran Street And Adjacent Streets Improvements Project

- Crack Sealing, ARAM, Slurry Sealing
- New pavement striping and marking
- Installation of Traffic Signals

Before construction

After construction

# Doran Street And Adjacent Streets Improvements Project

- **ARAM (ASPHALT RUBBER AGGREGATE MEMBRANE) INTERLAYER**

**Method used to extend life of severely distressed pavement that requires reconstruction and has low average daily traffic**

- Asphalt rubber with 3/8" aggregate
- Seals and corrects pavement
- Improves skid resistance
- One-Day Processes
- Not finished street.
- Usually covered with Slurry Seal or Asphalt Paving
- Irrigation should be turned off
- Parking and access to your street will be unavailable during the day of ARAM application
- Parking will be available on nearby streets
- Street will be fully opened in the evening barring any unforeseen conditions

# Doran Street And Adjacent Streets Improvements Project

## • RESURFACING

**Method used to improve the ride of the roadway and structural integrity of the pavement**

- Grind 2" of existing AC
- Place 0.5" leveling course
- Place ARAM (Selective areas)
- Place 1.5" Asphalt Rubber Hot Mix
- Approximately 4-One Day Process
- Begins NEW service life for pavement
- Prevents Excessive AC Pavement Removal and Replacements
- Irrigation should be turned off
- Parking and access to your street will be unavailable during the day of ARAM application

# Doran Street And Adjacent Streets Improvements Project

- **SLURRY SEAL**

**Method used to preserve, protect, and extend the life of pavement**

- Crack sealing first
- 3/8" thick-seals and corrects pavement
- Improves skid resistance
- Economical
- 1 Day Process
- Irrigation should be turned off
- Parking and access to your street will be unavailable during the day of Slurry Sealing
- Parking will be available on nearby streets
- Street will be fully opened in the evening barring any unforeseen conditions

# Doran Street And Adjacent Streets Improvements Project

## Construction Phasing

- PHASE 1:
  - APPLICATION OF CRACK SEAL
  - CONCRETE REMOVAL AND REPLACEMENT
- PHASE 2:
  - ASPHALT CONCRETE PAVEMENT REMOVAL AND REPLACEMENT
- PHASE 3:
  - ASPAHLT RUBBER AGGREGATE MEMBRANE
  - STREET RESURFACING
  - APPLICATION OF SLURRY SEAL
- PHASE 4:
  - INSTALLATION OF TRAFFIC SIGNALS, STRIPING, SIGNING, & PAVEMENT MARKINGS

# Doran Street And Adjacent Streets Improvements Project

- Streets may be closed during construction
- Street parking will be prohibited in work areas
- Construction may be allowed on Saturdays if necessary
- Construction equipment and materials may be stored on the street

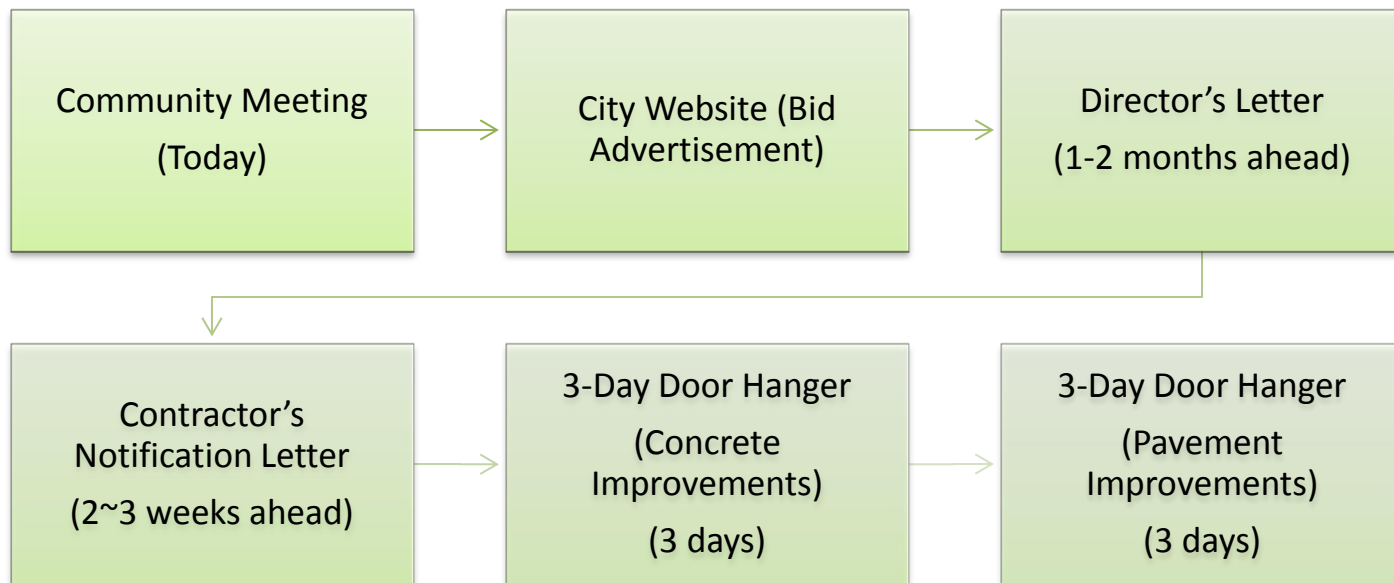

# Doran Street And Adjacent Streets Improvements Project

- Road open and parking available during non-working hours
- Provide alternate traffic routes and maintain access to driveways as much as possible.
- Street closure limited to the immediate work zone
- Curbs, gutters, sidewalks, and driveways will be constructed on one side of the street at a time
- Provide flaggers for traffic control where required.
